Notes:

Only one designed roll out that I saw, strongly implies coaches wanted to see him operate from pocket; which he did very well.

OL kept him pretty clean overall, took two sacks both of which came off blitzes

Very impressed overall with placement of intermediate throws. Not afraid to go over the middle but does seem to go right more often than not.

Highlighted one rollout in orange that was obviously not intended

Green highlights are throws/plays where I was overly impressed with Wilsons abilities. The one in red I really felt like he threw that ball away much too early
