About BBM

With BBM, you can chat and share in real-time with your BBM contacts and groups. For example, you can share pictures, see when someone has read your message or is typing a reply, and update your BBM status or picture. Share your news with multiple people using multiperson chats and group chats.

With BBM Groups, you can plan events, track to-do lists, share pictures, and chat with up to 30 people at the same time without needing to add them all as BBM contacts.

You can use BBM over a Wi-Fi connection, such as while you're travelling to avoid extra data charges. Some wireless service providers offer ways for you to check your data usage so that you know whether your service plan is appropriate for how you use your device.

Introducing BBM features

The features supported for BBM on your device include the following:

- **BBM profile:** Choose a display picture, name, and status that your BBM contacts see. You can also view your unique BBM PIN from your profile by tapping **Show Barcode**.

- **BBM Groups:** Plan events, track to-do lists, share pictures, and chat with up to 30 of your friends, family, or coworkers in one group at the same time.

FAQs

What sounds can I set for BBM?

BBM uses the default sound for your device. You can change the volume or select options like Vibrate or Silent in the settings for your device.

When you ping someone in BBM, the other person's device makes a sound (unless it's set to Silent). If you don't hear a sound when receiving a ping, check the sound settings on your device.

What emoticons can I use?

BBM includes different emoticons that you can use in your chats and status updates. You can type a 2-digit country code in asterisks to add a flag icon to your message, such as typing ***CA*** to add .

BBM can also display certain emojis, which are special emoticons created for Japanese electronic messages and webpages. Your contacts might not be able to see emojis that you copy and paste from a website into BBM.

Why don't all of my BBM contacts have profile pictures?

If some of your contacts don't set a profile picture in BBM, you won't see a picture for them in chats or in your list of BBM contacts.

Why can't I add a contact?

The person might not have BBM setup yet. If you invite a contact who has BBM but your invite is still pending, the person might not have responded to your invitation or the person might have ignored your invitation.

To view your pending invitations, complete the following:

1. Tap  > .
2. Tap **Sent**.

If an invitation remains in your Sent list for a long time, you can delete it. Just touch and hold the invitation and tap .

1. Tap  > .
2. Tap **Edit Blocked Contacts**.
3. Touch and hold a name.
4. Tap .

What is a BlackBerry ID?

A BlackBerry ID gives you access to BBM and any saved BBM data. After creating a BlackBerry ID for the first time, follow the instructions in the BlackBerry ID email to access all of the BBM features. If you already have BBM data for your BlackBerry ID, that data is associated with your device.

To view your current BlackBerry ID information, do the following:

1. Tap  > .

After a certain amount of time, if you aren't actively using BBM, you might be prompted to re-enter your BlackBerry ID password. If you want to sign in with a different BlackBerry ID in BBM, you can reinstall BBM.

How do I restore BBM?

After associating your BlackBerry ID with BBM, your BBM contacts, profile, and group memberships are automatically backed up over the wireless network.

If you switch devices or lose your device, you can restore your BBM data by using the same BlackBerry ID that you associated with BBM. If your BBM contacts appear but you're still missing some of your groups, you can ask someone from the group to add you again.

Can I send PIN messages?

Although you have a PIN in BBM, you can't send PIN messages. Your BBM PIN is a unique identifier used in BBM.
